

EEE 508: Term Project 1

Grading Sheet

NAME: Bijan Fakhri, Anirudh Som

Submission Instructions

Submit by due date via Blackboard under Projects a zipped folder named LastNames_Project1.zip, where LastNames are the last names of the members in your group. The submitted zipped folder should contain: 1) Program (commented source code and compiled executable code) in a folder called Code; 2) README file listing the implemented feature detectors/descriptors/methods and their application; citing any existing code or part of code used; describing DETAILED, step-by-step, compilation and running instructions, and also listing the folders that are contained in the zip file with a brief description of their content; 3) Input folder including the input data (images/videos and other) needed to run the code and to reproduce the simulation results to be included in the report (make sure your code is self-contained so that the TA can simply execute your code to reproduce your results); 4) Output folder including sample output results; 5) Report (pdf or word file); 6) this Grading Sheet with names of group members.

Software Grading

README file including instructions	/ 20
Source Code with Comments and Executable Code	/ 25
Input data needed to run the code	/ 15
Output data	/ 15
Code Execution	/ 25
Total	/ 100

Report Grading

Introduction	/ 10
Description of adopted feature detectors and descriptors and methods	/ 35
Discussion and analysis of the obtained results	/ 45
Conclusion and discussion of unsolved problems	/ 10
Total	/ 100
